

# Apache Hop

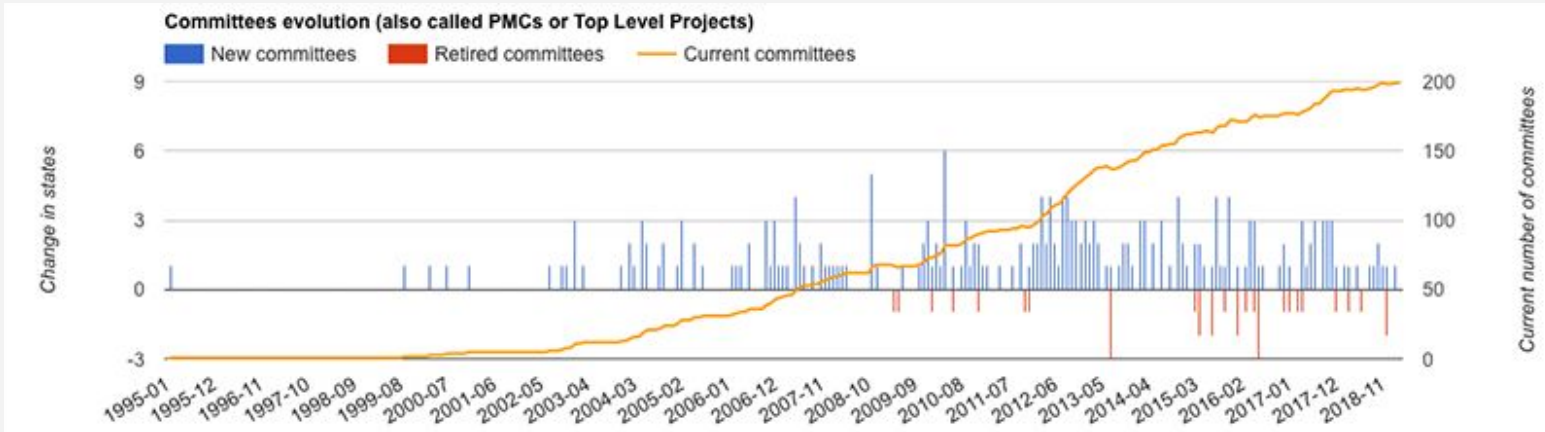

Importance of being an Apache Project, community

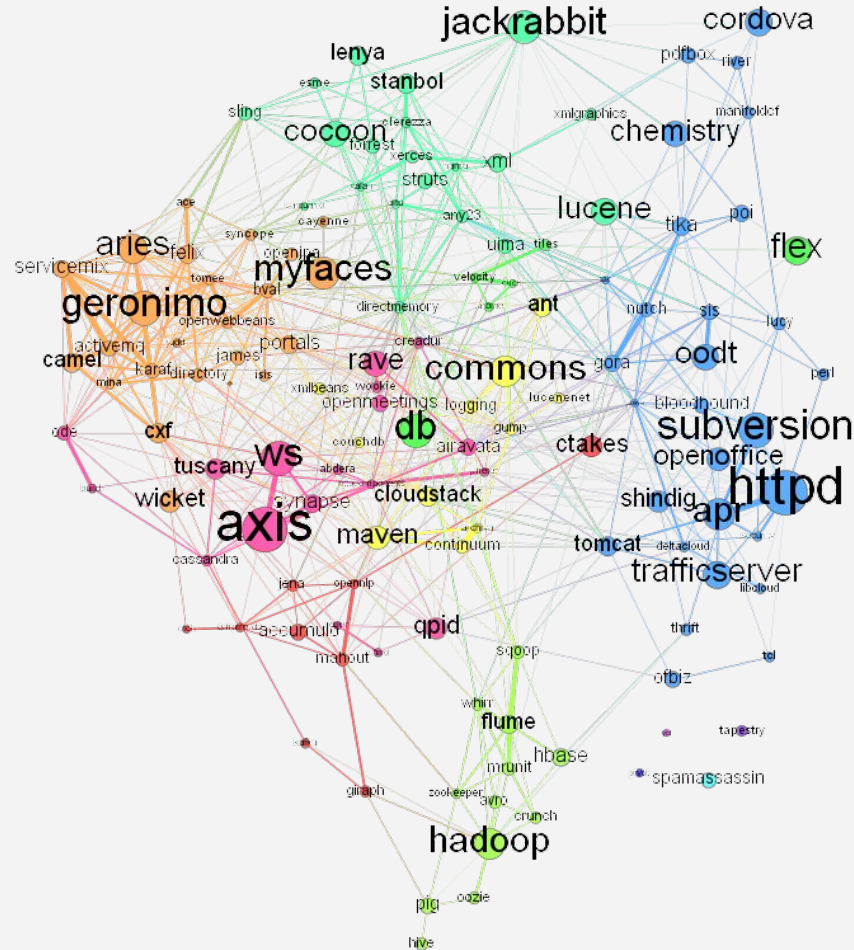

LEAN

# What is the Apache Software Foundation?

- It started with a single project, the Apache web server (httpd) around 2000
- Needed a non-profit foundation to own the IP
- Has since scaled to over 350 active projects
- Has a 'federal' approach to management – projects have considerable autonomy

LEAN

# Apache Software Foundation and projects

- **OPEN:** 350+ projects on a mission to provide Open Source software for the public good.
- **INNOVATION:** Apache Projects are defined by **collaborative, consensus-based** processes, an **open, pragmatic software** license and a desire to create **high quality software** that leads the way in its field.
- **COMMUNITY:** We are a community of developers and users of enterprise-grade, Open Source Apache projects used in every Internet-connected country on the planet.

### APACHE HOP GRADUATES AS A TOP-LEVEL PROJECT

**DISCLAIMER:** this is a reprint of the official Apache Software Foundation [press.release](#) about Hop's graduation.

LEAN

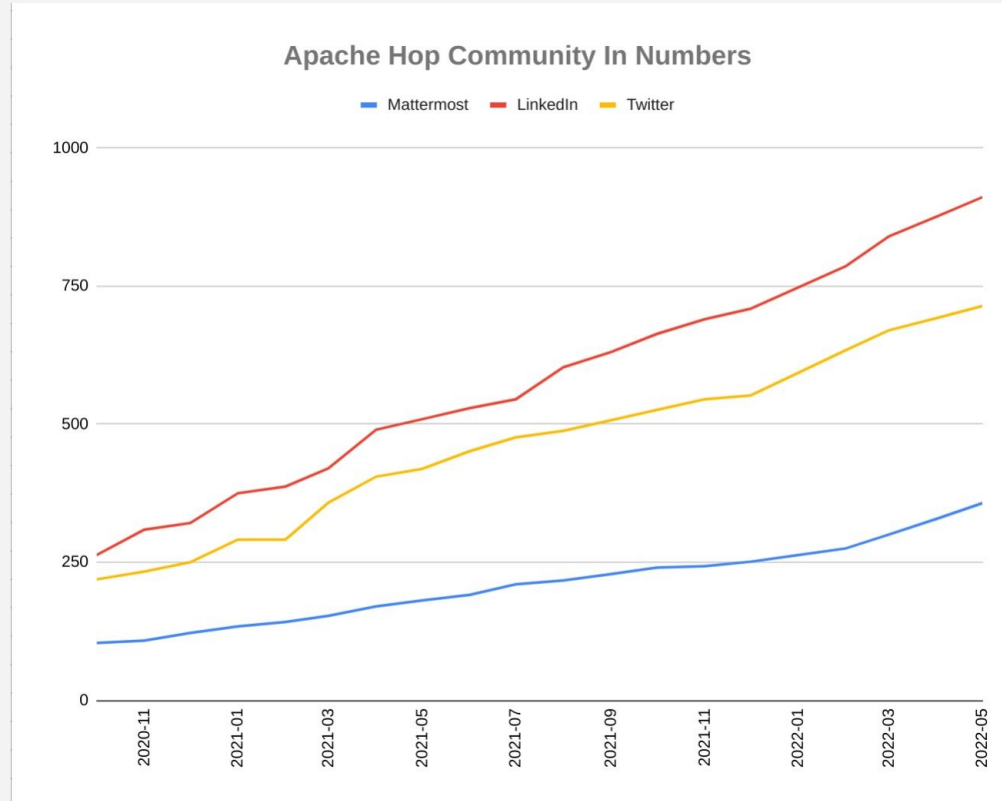

## Apache Hop - Community

### **“Great communities build great software”**

- Community driven - no single company drives the software
- Quickly growing community across all social media channels:
- Contributing is more than code: ideas, bug fixes, suggestions, documentation, translations, criticism, ...
- No bug is too small or too big to fix.
- No improvement suggestion is too small or too big to consider
